

Whether you're a newbie or experienced, whether you like them small and fast or big and slow, Tripoli has a place for you. Join a local Prefecture (club) or form your own, Tripoli will have you covered. Why not consider a Inter-National Organization dedicated to keeping non-professional High Power and Research Rocket activities alive, legal and safe.

Tripoli members are drawn from the United States and 22 additional countries across the globe. High Power and Research Rocketry is an educational, safe and exciting hobby enjoyed by thousands world-wide.

TRIPOLI

High Power & Research

Tripoli is a non-profit organization dedicated to the advancement and operation of amateur high power rocketry. Our members are drawn from the United States and 22 countries across the globe.

Tripoli members come from all walks of life and all ages. We have construction workers, medical staff, programmers, truck drivers, and anything else you can think of. There are even a few rocket scientists among us! Regardless of where you come from and what you do, there's room in Tripoli for not only you, but your entire family.

If you are interested in high power rocketry, we encourage you to contact your local member club (called a Prefecture) and attend their next launch or meeting. A listing of Prefectures and contact information is available on our website.

Tripoli is *the* premier high-power rocketry organization! If high-power flying is your primary **interest**, Tripoli is the organization you want.

Tripoli's annual launch, **LDRS**, is by far the best-attended high-power launch in the world! It's what you saw on the Discovery Channel!!

Tripoli flyers are taken seriously by the commercial rocket community. Tripoli members were the first civilians to **put a rocket into space** (CSXT), and Tripoli members have been invited to assist NASA on rocketry research projects.

Tripoli is an **international** organization, with prefectures worldwide. At Tripoli launches in the US, you may meet some of our members from Canada, Australia, the U.K., Sweden, Germany, Switzerland, Argentina and many more.

Tripoli has its own private, active **forums** so that members can ask rocket-related question and get answers (sometimes too many answers!), without the spam and noise that accompanies some other forums.

Tripoli-sanctioned launches are insured for up to \$3,000,000 with primary **insurance** coverage. That means that in the highly-unlikely event of an accident, Tripoli insurance kicks in first

Tripoli is an organization where there is **no "little guy"**. At Tripoli launches you'll meet both novices and experienced rocketeers, all open and friendly to newcomers, all eager to share knowledge.

In Tripoli you can **advance** into the exciting world of rocketry — designing, constructing and flying your own rocket motors!

Tripoli is a group of **serious rocketeers** that is open to new generations and new members.

Last but not least, Tripoli launches are just plain **FUN!!**

Take a moment to browse our website to learn more about the Tripoli Rocket Association or Join today! Your application is inside.

THE INTERNATIONAL ORGANIZATION
OF NON PROFESSIONAL ROCKETRY

HIGH POWER ROCKETRY

Tripoli's history of High Power Rocketry dates back to it's inception in 1964. A group of young high school rocket people formed a Science Club devoted to rockets and that started it all. When they found that the current, at that time, rules limited their interests and needs they began using larger, sometime home made, motors to power their larger rockets and experiments. And the fun began.

TWO GREAT INTERNATIONAL LAUNCHES EVERY YEAR And All The Local Ones Too.

LDRS

RESEARCH ROCKETRY

Research Rocketry came naturally to Tripoli. With a membership of adult rocket people it didn't take long before new frontiers had to open and Tripoli was flexible enough to let it grow. Now Research Rocketry means more than just motors; it covers fabrications, electronics, photography recovery and more. Today the sky is unlimited, be it large fun rockets or sleek edge of space capable ventures.
